

Ref-egg-tions

110 x 118 Stitches

You will need about one skein of floss when stitched over 14 count fabric with two strands. This sampler could either be stitched as a whole or as individual patterns. The big advantage of monochrome patterns is that you can choose any colour and/or fabric from your stash ...

Kindly note that I have not left any rows or cloumns for each side of the pattern. Please remember to increase this figure for moulding.

Happy Stitching, Happy Easter!
