

Petition Demanding Measures to Fukushima Nuclear Disaster Victims

The Government of Japan and TEPCO,

We request that:

1. the Japanese government must protect the right to evacuate of all people in radioactive-contaminated areas and to implement economic, medical and education support for them.
2. the Japanese government not lift the evacuation order in areas where annual radiation exposure measures 20 millisievert or less, not cut off compensation to victims, or force people to return to areas with radioactive exposure.
3. the Japanese government must implement a health survey for Fukushima nuclear disaster victims. If a disease is detected among the affected population, the government must provide medical security to patients.
4. all people who participate in the health survey have the right to know the test results. All medical data must be disclosed, and medical care professionals and specialists must have access to data.
5. the Japanese government implement a health survey particularly for children, pregnant women, and Fukushima plant operators as soon as possible.
